DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see response, filed 12 March 2009, with respect to the claim objections and 35 USC §112 rejections have been fully considered and are persuasive. The objections/rejections of the claims have been withdrawn.

Allowable Subject Matter

2. Claims 1-51 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest a system or method for generating and adjusting chroma and intensity values as claimed. Furthermore, while the patent issued from the parent application (US 6,628,327) claims a similar system and method, the addition of simultaneous generation and adjustment of the chroma values in the present application is not claimed in the '327 patent and is not found to be an obvious variant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy J. Henn whose telephone number is (571) 272-7310. The examiner can normally be reached on M-F 11-7.
